Computers and Records Seized of Dr Gatti and Dr Montanari (<https://www.ageofautism.com/2018/02/computers-and-record-seized-of-dr-gatti-and-dr-montenari.html>)

The computers, records and data of Antonietta Gatti and Stefano Montanari have been seized by the Italian "Guardia di Finanza".
Sanevax comment: (<https://www.facebook.com/sanevax.inc/posts/2024722697556363>)

BREAKING NEWS: This morning two scientists from Italy lost their computers, records, and data - all confiscated. Dr. Gatti and Dr. Montanari have been studying the potential effects of micro- and nanoparticles used in vaccines on the human body for years. One of them was scheduled to testify in court regarding an alleged vaccine injury. Several conference presentations were also scheduled over the next few months. Now, there is no data to present. Coincidence? Or, suppression of inconvenient scientific findings?

The website of vacciniinforma.it (<http://www.vacciniinforma.it/2018/02/23/guardia-di-finanza-nel-laboratorio-della-dott-ssa-gatti-e-montanari-la-medicina-ostacolata-come-sempre/5580>) reproduces the facebook page of Dr Montanari with the comment "FINANCIAL GUARD VISIT THE LABORATORY OF DRS GATTI AND MONTANARI, MEDICINE IS OBSTRUCTED AS USUAL".

No one, of course, challenges the pharmaceutical industry in order to make money but the cozy relationship (<https://worldmercuryproject.org/news/fast-tracking-mandatory-vaccination-government-media-muzzle-scientists/>) of the industry to the Italian government (<https://www.ageofautism.com/2017/12/john-stone-presents-written-evidence-to-uk-parliament.html>) is well documented, and this will be a contentious event in the forthcoming Italian national election.

A groundbreaking study "New Quality-Control Investigations on Vaccines: Micro and Nanocontamination (<http://medcraveonline.com/IJVV/IJVV-04-00072.pdf>)" by Gatti and Montanari was published in the International Journal of Vaccines and Vaccination early last year:

Abstract

Vaccines are being under investigation for the possible side effects they can cause. In order to supply new information, an electron-microscopy investigation method was applied to the study of vaccines, aimed at verifying the presence of solid contaminants by means of an Environmental Scanning Electron Microscope equipped with an X-ray microprobe. The results of this new investigation show the presence of micro- and nanosized particulate matter composed of inorganic elements in vaccines' samples which is not declared among the components and whose unduly presence is, for the time being, inexplicable. A considerable part of those particulate contaminants have already been verified in other matrices and reported in literature as non biodegradable and non biocompatible. The evidence collected is suggestive of some hypotheses correlated to diseases that are mentioned and briefly discussed.

Comments

Autism is on a dramatic rise. No controls were done for the combined vaccine MMR, which is the basis for all scientific work. This was revealed in the Congressional hearings regarding safety. The VAXXED documentary shows a Real scientist pursuing the truth he found in the data, and who was castigated and ridiculed for his work. Gatti's and Montanari's work does have a control; the one animal vaccine had no metal particulate matter. Their work

needs to be pursued, and reproduced. True scientists should be doing this for the sake of understanding and vaccine safety.

With the seizing of Gatti's and Montinari's work we see a concerted effort to block scientific research that is detrimental to the pharmaceutical agenda.

There are many scientists not controlled by the pharmaceutical companies that can and should pursue this study. They too will be attacked and ridiculed, but it is the only way to get the truth.

I could see her mind questioning everything she had learned. It is just easier to call my unvaccinated son a "miracle" then to admit Vaccines are poisoning our children's blood.'

The same reason why the invented the term 'autistic'.

It's a lot easier for them to say, than vaccine injured.

Rules of Engagement: (John please take note)

Mr. Chopin--I think there was a reasonable question first posed by you, "They couldn't have done anything wrong could they? (I mean apart from not using controls in their "nanocontamination" research)." OK, fair enough, lets ask Gati and Montanari. Is this something (lack of controls) you would have time to pursue in the interest of science and report back? Secondly, Grace Green made this point to you--"Fred, if they were in the wrong the evidence would speak for itself, so why would it need to be removed by the police?" Doesn't this seem extraordinarily odd to you that research would be seized?

Lastly, John Stone spoke to you with this comment, "Why are you so sensitive when you generally come on here to insult people yourself, and you of course are not the remotest bit concerned with the legion shortcomings of the official science." Yes, it appears you are not the remotest bit concerned with the legion of shortcomings with the official science and policies underpinning what is injected into children and adults?

There are some basic Rules of Engagement and above questions highlight what I believe you conveniently ignore. You are not alone. Mainstream media, the medical industrial complex conveniently ignore decades of inconvenient truths. Inconvenient truths that readers and commenters at AoA know all to well--painfully, depressingly well.

Mr. Chopin, these are Rules of Engagement at AoA that I am suggesting for you : Age of Autism is an upper level course in the 200-400+ university hierarchy of courses. There is vaccination 101 short course prerequisite you are required to take for your comments and questions to contribute to their ultimate benefit of AoA readers. At the World Mercury Project is a 7-part series that was written by Vera Sharav. This series is a glimpse into the "legions of scientific shortcomings, (that most open-minded scientists and average consumers would call fraud and scientific misconduct) that John Stone's comment posed to you.

Finally, perhaps I am just thin-skinned, but I find the pejorative term anti-vaccine hurtful, because many times its accompanied by anti-science, flat-earthers, tin-foil hat wears thrown at people like us to purposefully ridicule, demean, insult, dismiss, marginalize, humiliate, our AoA collective family experience. So yes, I cry from the hurt and this on-going catastrophe and my loved ones see the grief, pain and my righteous anger that the Fred Chopin's cannot or will-not grasp; but our children see us in pain and possess enough empathy to feel the ridicule and hurt as well.

Mr. Chopin, I'm asking you to dig deeper, that's all.

@Whaleto

I do not think that except for alum and mercury heavy metals are found in any toxic quantities in vaccines, you will accumulate more from air or water over time.

I wonder if it was ever considered that you can become immune to other things that are in the vaccine, that could include DNA or human proteins.

The nanoparticles are not enough to cause toxicity but what they can do is to stimulate your immune system and cause other reactions. Perhaps they could cause your body to become sensitized against metals which are now to be found everywhere. The study mentions that metals could combine with proteins and cause autoimmune reactions. More likely than old-school toxicity and far more damaging.

@Frederic Chopin

interesting that you talk about the lack of controls. Guess what, vaccines do not have any proper controls when safety testing is done. See Gardasil.

Either an immune stimulating adjuvant is used or another vaccine. This is not water as a placebo.

When a study supports the safety of vaccines the lack of proper controls does not matter and it is science when a study shows the opposite the lack of controls makes it unscientific.

Elevated alum in the brains of autistic people is unscientific because no controls were used.

Gardasil is scientific because no proper controls were used.

Metal contamination in vaccines is not scientific because no controls were used.

A mercury placebo in a flu vaccine study is very scientific because everyone knows mercury makes good placebo.

Like everyone you are biased and more interested in being right than being truthful, admit it or not. Who cares at this point.

http://whale.to/c/antonieta_m_gatti.html (http://whale.to/c/antonieta_m_gatti.html)

this comment must have been a red flag and a half to them:

"Dr Gatti remarked on the researchers' finding that the animal vaccine (Feligen) was clean of any particulate matter, debris or other contaminants, saying, "It is evidently possible to produce a clean vaccine." ~ Robert F. Kennedy Jr

as it proves they aren't really 'contaminants', they are deliberate poisoning

"I admit I have been nervous about announcing this on FB, but it is time people speak the truth they know. It is time to #BeBrave . Here is my small personal anecdote: My son is unvaccinated and when he was 3 the doctor suggested a blood test to check for anemia, lead, toxic metals. Okay. She returned with the results in her hands, and the Pediatrician's face was ghost white. She looked like she might faint. I was terrified and rushed to her saying, "What's wrong with my son?". She fluttered her eyes and shut her gaping open mouth trying to compose herself and whispered, "Nothing. Nothing. There is nothing wrong with him. His test is clear. No lead, nothing. I have never seen this before. He is like a miracle." Her eyes were darting back and forth like she was afraid someone would hear her and like she really wished she could talk to me further about this privately, but we were in a hallway. Whew. I

couldn't leave fast enough because my heart was racing. My last visit a different pediatrician was there and he also referred to my son as "the miracle child". It disturbs me. He is no miracle... well no more miracle than any other child of God would be. In fact he has the MTHFR gene, so cannot detoxify as easily as other children that do not have that gene. He is just a child raised on organic foods and not vaccinated. Vaccines contain many heavy toxic metals is the bottomline. That pediatrician got a glimpse of seeing the truth in the light of day, and it upset her very much. I could see her mind questioning everything she had learned. It is just easier to call my unvaccinated son a "miracle" then to admit Vaccines are poisoning our children's blood." #Vaxxed #Science #Truth #PrayBig #WeAreVaxxed

And mercury and aluminium are still in all vaccines <http://whale.to/m/quotes13.html> (<http://whale.to/m/quotes13.html>)

That's not unbelievable as vaccination has been long proven 100% ineffective, it's the wrong/false germ theory for one, Virology is the racket that created vaccination http://whale.to/c/disease_theory_summary.html (http://whale.to/c/disease_theory_summary.html)

that runs the viral fear racket http://whale.to/a/infectious_scares.html (http://whale.to/a/infectious_scares.html)

and it's only designed purpose is to create disease, human vivisection essentially, to feed off, eg \$10 in antibiotic sales to treat vaccine induced ear infections <http://whale.to/vaccine/otitis.html> (<http://whale.to/vaccine/otitis.html>)

For god knows how many decades, producing then, antibiotic fallout like asthma <http://whale.to/drugs/antibiotics.html> (<http://whale.to/drugs/antibiotics.html>)

while suppressing the harmless cures, eg vit c http://whale.to/a/vit_c_cons.html (http://whale.to/a/vit_c_cons.html)

and then they proved they made no difference and were advising not to use them <http://www.telegraph.co.uk/news/2017/09/22/dont-prescribe-antibiotics-common-ear-infections-doctors-told/> (<http://www.telegraph.co.uk/news/2017/09/22/dont-prescribe-antibiotics-common-ear-infections-doctors-told/>)

No-vac,

The cat vaccine wasn't used as a control - nothing was. You can't go back and pick 1 sample out of 44 and say it's the control. And it wasn't pure anyway as they found "debris" in it. The reason for controls is to show there's SOMETHING in the world without "nanocontamination" and to show they could consistently NOT find anything in them because they used a multi-step process (read the methods), any of which could have introduced contamination, especially at a molecular level.

The most detestable line in the paper? "Our hypothesis is that this contamination is unintentional..." I'm sure you hated that too but for entirely different reasons.

And name ONE skeptic person who attacks and ridicules children.

Fred,

There is no need to test distilled water, as it is well known that it does NOT contain all Mendeleyev table of toxic metals. And vaccines should be made based on solutions made from distilled water, like all biochemical experiments are done. Furthermore, the Italian authors have compared 44 different vaccines, including one for cats. All human vaccines contained soup of toxic metals, but the cat vaccine was pure. This is your CONTROL which shows that vaccines can be made pure. Contamination of human vaccines tells us that they are purposefully made to be extremely toxic to work as slow killing bioweapons.

Re insult. We - the Age of Autism Community - are fed up of insensitive people like you, who ridicule and attack vaccine injured children, their parents and all who fight for vaccines safety. We are past the political correctness and past being nice. We are angry like hell at pharmaceutical mafias and corrupt politicians for holocausting millions of innocent children in the US and all around the world. Now we are in attack mode and we won't stop until we save the children from genocidal pharma/bureaucratic criminals and see them all at gitmo for life.

No-vac,

There's no reason to be insulting. When you're looking for single molecules with electron microscopy and claiming vaccines are contaminated you have to show SOMETHING that isn't. Like some other injectable - sterile water maybe, normal saline, whatever. The fact that they purposefully DIDN'T suggests they thought vaccines would be as clean or cleaner.

This computer & records seizure wasn't done in secret, and some news would get out. So either the Italian Gov't doesn't care that people know what happened, or else they WANT people to know. Maybe it was done as "a show of force", basically, they did it "because they could". If this was purely a *financial/fraud* investigation, why would they also need the *scientific* data? I'm only thinking out loud here. We'll have to see what happens with this case in coming days & weeks....

But the idea of "nano-particles", and "nano-contaminants" in vaxxes, and other PhRMA products, is SCARY! // Independent of this whole issue, I noticed a few years ago, that ALL the big advertisers were starting to introduce "nano-this", and "nano-that" into both products, and advertising.... BUT, a couple years ago, I noticed that I was no longer seeing much, if any mention of "nano-anything" in main stream media advertising. Have the perils of nano-tech been shown to outweigh the positives, or do "THEY" just not want us to know what sorts of "nano-scale funny business" is going on?

KEEP UP the GOOD WORK, people!

Freddie,

Are you really as monstrously stupid as you present yourself here? The "control" to vaccine contaminations is no contaminants. Period. It is expected that vaccines are free of metallic and other contaminants. If you find them there it means that the manufacturers either intentionally added them, or are using industrial waste water for vaccine production. Both versions are criminal. It is obvious from your comments that you have no faintest idea about science. Yes, ask your pharma handlers what the contaminants on vaccines really mean.

It's Official – Teens Diagnosed With MS After Gardasil Vaccines

In 2015, a Scandinavian study found no increased risk for Multiple Sclerosis or demyelinating disease among 4 million females, of whom 800,000 received the HPV vaccination.

But at a recent forum in San Diego, researchers presented two cases of multiple sclerosis (MS) that had developed in teenagers after receiving Gardasil, the human papillomavirus (HPV) vaccine.

The study author Ye Hu reported on 2 teens who experienced MS symptoms 1 to 2 weeks after receiving the vaccination.

I will tell you what its all about Freddie.

Global Slow Kill are having a lot more trouble in Italy than they ever expected.

Why don't you call up your handler at GSK and ask him ?

And these planned Gatti presentations would help overturn the mandatory vaccine laws (5 star).

I bet that is what this is all about (yes speculation on my part).

Ask Amanda Knox about the Italian legal system.

They couldn't have done anything wrong could they? (I mean apart from not using controls in their "nanocontamination" research)

As a Jew whose paternal family was virtually eradicated and murdered by Nazis, I can tell you that Mr. Litten is not just imagining things. History may not repeat but it sure does rhyme.

Gatineau woman succumbs to flu after going to 4 different hospitals

Cynthia Thibaudeau had received the flu vaccine and was a healthy young woman, studying social work. Her boys are 5 and 6.

"They took it hard," says their father, "They are strong they are young and will have great memories of their mother."

Patricia

It can just as easily happen in the US or UK, just different styles.

First they came for the "alternative doctors" & killed 78 of them, and I did not speak out—

Because I was not an "alternative doctor" (& I didn't understand, I was too busy watching rubbish primetime reality TV).

Then they came for the anti-vaccinationists, and I did not speak out—

Because I was not an "anti-vaccinationist" (& I didn't understand, I was too busy with endless repetitive sporting events on TV).

Then they came for the so called "conspiracy theorists", and I did not speak out—

Because I was not a "conspiracy theorist" (& I didn't understand, I hadn't picked up or read a book since I was forced to in school aged 14).

Then they came for me—and there was no one left to speak for me

(& I still didn't understand, the truth is I'm a bit dim – where is my TV?).

What is next ?

Internment without trial.

Forced vaccination , physically restrained.

This is definitely 1939-45 all over again.

"BREAKING NEWS: This morning two scientists from Italy lost their computers, records, and data - all confiscated. Dr. Gatti and Dr. Montanari have been studying the potential effects of micro- and nanoparticles used in vaccines on the human body for years. One of them was scheduled to testify in court regarding an alleged vaccine injury. Several conference presentations were also scheduled over the next few months. Now, there is no data to present. Coincidence? Or, suppression of inconvenient scientific findings?"

Coincidence? Or suppression of inconvenient scientific findings?

None of the above .. it is simply the DEEP STATE doing what it always does to protect just ONE of their primary "stakeholders" .. the "scientific/ethically/morally" bankrupt .. global pharmaceutical despots.
